

As promised we are proud to announce the publication
of the
4th Edition of Roger Hosking's

PAQUEBOT CANCELLATIONS OF THE WORLD

October 2010 – just in time for Christmas

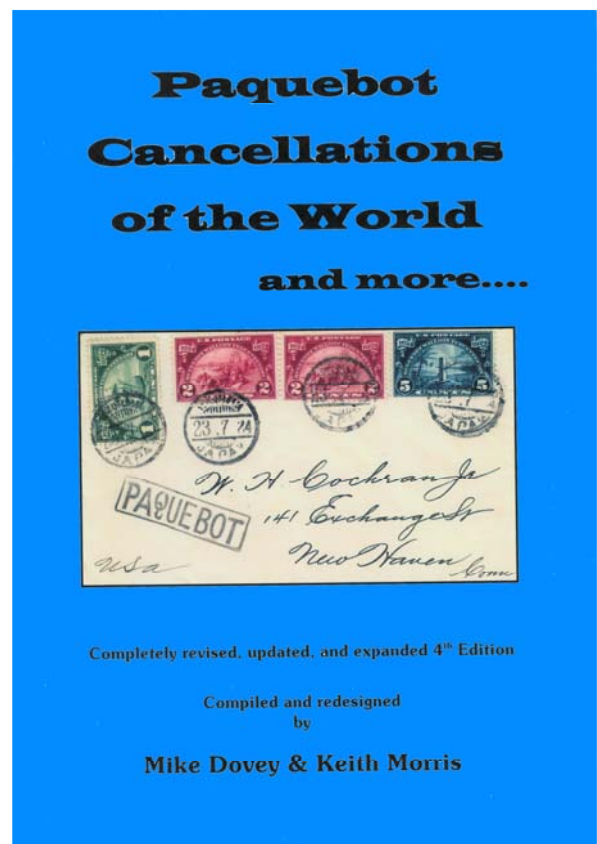

This new edition is the first that has not been written by Roger himself, however Roger did give his full permission for us (Mike Dovey and Keith Morris) to write a new 4th edition and he has been a constant help during the nearly 5 years that it will have taken to produce the volume.

This new volume of the book will include everything that has gone on before, that is a superb simplified listing of all paquebot marks up to July 2010 where known, but will have added features that have not been included before. These include:- A new easier to follow format where tables and diagrams are paged in an easier viewed listing. We have amalgamated the old Hosking numbers from the 1977 and 1987 books plus the 2000 edition in the tables. The tables now also show Studd numbers and the Joesten numbers as per their respective books.

Duplicate diagrams have been eliminated and a much easier "Omnibus" system has been introduced (much the same as the GB and French 22, 36, 410 & 419 numbers) to solve problem countries like Norway and Denmark where diagrams were repeated and new numbers awarded.

The "Written paquebot" section (chapter 19) has been expanded to give a much clear view of ports available while the numbers 4001 – 4045 have been expanded into new chapters numbered 20 – 28 to be used as a reference to expand the reader's knowledge further on a variety of subjects never covered before.

This new edition is not to be missed, it is well worth buying and October is the month to get a copy, the result will be a superb read and reference work for all collectors, so place your order as soon as possible. NOW!

10 years ago the 3rd edition was priced at £44. Now, ten years later, the 4th edition will be 10% cheaper and priced at £39.95 with so much more included.
